To whom it may concern

Certificate of Toxicological Classification/Registration in the Country of Origin

We herewith certify that **Dipan S.A., CH-1227 Carouge-Genève, Switzerland**
has registered at the Swiss Federal Office of Public Health the following chemical preparations

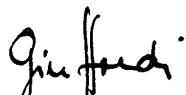

Trade name	Registration number, BAG T No	Toxicity category
Dipan 1000	601100	not classified
Dipan 2000	602084	4
Dipan 2030	681284	4

They have been duly evaluated by us in accordance with the Swiss Toxicity Legislation and the exigencies of the Swiss Federal Law on Trade in Toxic Substances of 21st March 1969 and the Implementing order of the Swiss Federal Law on Trade in Toxic Substances of 19th September 1983.

They have been examined to their actual compositions and their calculated hazards. Bearing the prescribed warnings and precautions they are free for sale and use to the industrial and commercial users in Switzerland.

The Swiss classification system for industrial and commercial products has a range of four toxicity categories, of which category 1 is the most severe, category 4 the less severe classification.

Division of Chemicals

TO WHOM IT MAY CONCERN

Certificate of Toxicological Classification/Registration in Switzerland

We herewith confirm that the following chemical preparation :

Dipan 2020

Manufactured and distributed by :

Dipan SA, CH-1227 Carouge-Genève

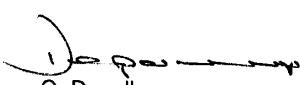

has been duly evaluated by us in accordance with the requirements of the Swiss Federal Law on Trade in Toxic Substances of 21st March 1969 and the Implementing Order of the Swiss Federal Law on Trade in Toxic Substances of 19th September 1983.

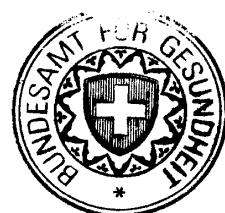

The afore mentioned product is registered with the Swiss Federal Office of Public Health, Berne, Switzerland under control number BAG T 57760.

This product has been examined to his actual composition and his calculated hazard. It is classified in toxicity class 4. Under strict adherence to the prescribed warnings and precautions the product is free for sale and use in Switzerland. The Swiss classification system has a range of five toxicity categories, whereas category 1 is the most severe, category 5 the less severe classification.

The Office of Public Health is the unique authority in Switzerland to classify and registerate products in accordance with the Swiss Toxicity Legislation.

Yours sincerely

O. Depallens
